Adding Fractions

- 1) $\frac{9}{90} + \frac{12}{18} = \frac{9}{90} + \frac{60}{90} = \frac{69}{90} = \frac{23}{30}$
- 2) $\frac{9}{20} + \frac{1}{5} = \frac{9}{20} + \frac{4}{20} = \frac{13}{20}$
- 3) $\frac{6}{22} + \frac{16}{66} = \frac{18}{66} + \frac{16}{66} = \frac{34}{66} = \frac{17}{33}$
- 4) $\frac{9}{43} + \frac{5}{86} = \frac{18}{86} + \frac{5}{86} = \frac{23}{86}$
- 5) $\frac{4}{5} + \frac{11}{90} = \frac{72}{90} + \frac{11}{90} = \frac{83}{90}$
- 6) $\frac{5}{8} + \frac{15}{32} = \frac{20}{32} + \frac{15}{32} = \frac{35}{32} = 1 \frac{3}{32}$
- 7) $\frac{2}{64} + \frac{2}{4} = \frac{2}{64} + \frac{32}{64} = \frac{34}{64} = \frac{17}{32}$
- 8) $\frac{4}{45} + \frac{14}{15} = \frac{4}{45} + \frac{42}{45} = \frac{46}{45} = 1 \frac{1}{45}$
- 9) $\frac{5}{15} + \frac{1}{6} = \frac{10}{30} + \frac{5}{30} = \frac{15}{30} = \frac{1}{2}$
- 10) $\frac{2}{3} + \frac{3}{13} = \frac{26}{39} + \frac{9}{39} = \frac{35}{39}$
- 11) $\frac{9}{86} + \frac{17}{43} = \frac{9}{86} + \frac{34}{86} = \frac{43}{86} = \frac{1}{2}$
- 12) $\frac{8}{94} + \frac{17}{47} = \frac{8}{94} + \frac{34}{94} = \frac{42}{94} = \frac{21}{47}$
- 13) $\frac{12}{41} + \frac{4}{82} = \frac{24}{82} + \frac{4}{82} = \frac{28}{82} = \frac{14}{41}$
- 14) $\frac{3}{5} + \frac{2}{4} = \frac{12}{20} + \frac{10}{20} = \frac{22}{20} = \frac{11}{10} = 1 \frac{1}{10}$
- 15) $\frac{2}{42} + \frac{4}{6} = \frac{2}{42} + \frac{28}{42} = \frac{30}{42} = \frac{5}{7}$
